A few words for MLA...

The **MLA OSCAR S.A.** was founded in 2007 and is located in the Industrial Area of Larissa, in a privately owned facility with modern building infrastructure covering 1,200 square meters.

In 2010, Mr. Manthos L. Antonis took over the company, and with his 30 years of experience in the field of hydraulic systems, he has made it one of the most productive manufacturers of hydraulic cylinders in the Greek market.

The activity that established **MLA OSCAR S.A.** as a leader in the industry is the manufacturing of hydraulic cylinders, which are produced in the company's facilities using a modern and automated production line.

These cylinders are manufactured in all sizes and for various applications, including agricultural, forestry, and earthmoving machinery, as well as for industrial use (such as heavy machinery like hydraulic presses or extrusion installations), shipping, and energy applications, where they are used in dam gates or photovoltaic movement systems.

With a strong commitment to customer service, **MLA OSCAR S.A.** provides comprehensive hydraulic component solutions, including pumps, control valves, and pressure hoses—products that are certified by reputable international manufacturers.

Additionally, **MLA OSCAR S.A.** conducts studies through its highly qualified personnel, who have extensive experience and the ability to advise, design, and manufacture complete hydraulic systems that simplify even the most time-consuming and complex tasks.

As the company's executives emphasize, any agricultural machine can be equipped with a hydraulic system to facilitate farmers' work, and **MLA OSCAR S.A.** excels at delivering the best solutions.

The quality of its products is ensured by the **ISO 9001:2015** certification and the continuous quality control carried out at every stage of the production process.
